

SalesTim Governance Automation

The SalesTim Governance Automation connector offers automation and integration of the SalesTim Governance Platform functions through Power Automate.

Pre-requisites

You will need the following to proceed: - You need to be a SalesTim Governance Automation administrator.
- You need to create an API Authentication Profile in SalesTim Governance Automation to generate an authentication ID. The authentication ID will be used to call the SalesTim Governance Automation API.

Supported Operations

The connector supports the following operations:

- `Get my templates` : Get details of a request.
- ...

Deployment instructions

Please refer to these instructions to deploy this connector as custom connector in Microsoft Power Automate and Power Apps.
