Experimentations using the Microsoft Teams client source code

<https://www.joseespitia.com/2018/08/30/how-to-disable-microsoft-teams-from-running-at-logon/>

Example: Update locales

Build

```
sudo rm ./usr/share/teams-insiders/resources/app.asar sudo asar pack ./usr/share/teams-insiders/resources/src/
./usr/share/teams-insiders/resources/app.asar --unpack *.node sudo cp ./usr/share/teams-insiders/resources/app.asar
./usr/share/teams-insiders/resources
```

Installed in /usr/share/teams-insiders/

```
sudo cp ./usr/share/teams-insiders/resources/app.asar /usr/share/teams-insiders/resources
```

```
fix build cp -r ../app.asar.unpacked/node_modules/* ./node_modules/
```

Electron version From native modules build error

Launch script

```
#!/bin/sh
```

```
SCRIPT=$(readlink -f "0")USR_DIRECTORY=(readlink -f $(dirname $SCRIPT)/..)
```

```
TEAMS_PATH="USR_DIRECTORY/share/teams - insiders/teams - insiders"TEAMS_LOGS =
"HOME/.config/Microsoft/Microsoft Teams - Insiders/logs"
```

```
mkdir -p "$TEAMS_LOGS"
```

```
nohup "TEAMS_PATH"@" > "$TEAMS_LOGS/teams-insiders-startup.log" 2>&1 &
```
